Protect your child from RSV

Lorain County Public Health
For the Health of Us All

RSV is a respiratory virus that causes cold-like symptoms.

RSV can be serious, especially for infants and young children.

- For children under age 1, RSV is the most common cause of bronchiolitis (inflammation of the small airways in the lung) and pneumonia (infection of the lungs).
- Older adults, and people with chronic diseases or weakened immune systems are also at risk of getting very sick.

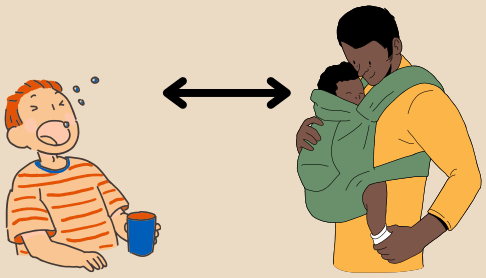
Prevent the spread of RSV to protect your child and loved ones.

Wash hands often.

Stay home when sick.

Avoid touching your face.

Cover coughs & sneezes.

Clean & disinfect surfaces.


Avoid close contact with sick people.
