

# Summary of reported COVID-19 cases

- Data is obtained from Ohio Disease Reporting Systems, with additional information from contact tracing.
- Race category “Other” includes: American Indian and Alaska Native, Asian, Native Hawaiian and Other Pacific Islander, and two or more races.
- Data within the past two weeks is considered preliminary as it is likely under-reported to LCPH due to the delay of initial contact with health care provider, testing, and diagnosis.
- Due to ODH reporting errors, Lorain County added 82 deaths between October - December. This error was not unique to Lorain County and occurred statewide.

## Definitions and Notes:

**Total Cases** – includes lab-confirmed COVID-19 cases. This does not include rapid antigen tests.

**Age Range** – the spread of cases, from youngest to oldest.

**Age Median** – the age of the case in middle of the range.

**Earliest Known Date Range** – Date defined by the first known date of symptom onset, if unknown then the earliest known date associated with the case is used.

**New cases** – New cases that were reported to LCPH within the past week
